

Problem- cracked, peeling paint on buildings. Short durability of existing coatings

Reference- Wheaton College 2007
Wheaton Illinois

Contact: Cal Johnson- Painting Department foreman

Comments:

Cal uses XIM products on a variety of jobs at the college. He really likes using Peel Bond with SW Durations for a long lasting finish on exterior wood surfaces. He is impressed with the look that Peel Bond provides along with its high build qualities and durability.

Other XIM products used- 360 anti-corrosion primer, UMA, 400W and 400 Clear aerosols.
